

To mark World Water Day 2011, three students from Rang a Sé decided to investigate how much water is used in some everyday activities. They uncovered some amazing facts.

Read on!

In one day, a running hose uses 26,400 Litres of water.

On average, every dishwasher uses 25 Litres per cycle.

On average a bath uses 80 Litres of water per bath.

If you leave the tap on while you brush your teeth you use 6 litres of water per minute!

On average each person in the Greater Dublin Region consumes 150 litres of water per day!

The percentage of water you flush down your toilet in work is

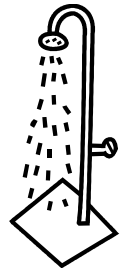

43%.

A gravity-fed shower uses 35 litres of water per shower.

A power shower uses 80 litres of water per shower.

Did you know that 1 flush of a toilet uses 9 litres of water?
